**TEQIP-III Sponsored International Conference
On “Gender Equity: Challenges And Opportunities”,
19 & 20 December 2019**

About the conference - For centuries gender has defined, shaped and limited the role of individual in the society. But from Simone de Beauvoir to Judith Butler gender roles have undergone a process of deconstruction. Binaries have been questioned and they no longer define the trajectory of individual's life. As Judith Butler rightly remarked, “Masculine and Feminine roles are not biologically fixed but socially constructed.” In the process of challenging the stereotypes many boundaries have been broken as women have successfully adapted to professions other than teaching, while men have also achieved comfort in managing home. And most significantly the third gender is now a recognised section of the society. But this transition has not been overnight as for years' individuals, people and societies have lived the dilemma of how and how far the shackles of gender roles can be decimated. It has witnessed many layered conflicts. Be it: domesticated woman vs. career woman; macho man vs. effeminate man; or LGBT and their existential crisis in the patriarchal society. From Manu smriti to Vishaka Guidelines and removal of Section 377 of the Indian penal code, the question of gender equality has been a contested site. A lot has changed but a lot needs to be changed. In an age where gender roles are re- assessed, re-created and re-framed, it's time to think of the challenges and opportunities brought forth by gender equity. Therefore, this conference is an attempt to understand the myriad moods and pathways not just roles and turbulence caused by these precursors of change. It aims to provide a platform for people of all genders and professions to unapologetically present their views and reviews, opinions and analyses, hypothesis and findings, his- story and her- story. It invites witness, victim and critics to share their perspectives.

Who can participate - This conference is a rare interdisciplinary platform for people of all ages, genders, professions and nationalities, as it invites discourse not just by academicians, researchers, scholars, writers but also doctors, administrators, lawyers, scientists, students, artists, in-short professionals and thinkers from any field who feel passionate about gender equity.

It aims to discuss not just the issues in our respective pasts like gender oriented myths, patriarchal traditions and values, historical perspective on patriarchy, male hegemony in terms of resources, finance and decision making; but also the present and future issues like acceptance and equal treatment of woman at workplace, need for behavioural changes, acceptance of LGBT at workplace, sensitization of children and adults towards gender equity, empowerment of the second and the third gender, and most importantly recognising merit regardless of gender. It promises to be an open platform to voice, share, discuss, develop, exchange, revise one's opinion on gender issues, as we need to assess the challenges and map the opportunities beyond the obvious boundaries of social acceptance. For this we invite panels and papers to define, interrogate and analyse equity in context of gender. The conference will discuss themes as broad as gender equity in terms of past/present/future; home/workplace; theory/praxis; written/oral discourse. participation is also invited for panel session on psychological aspects of empowerment and leadership, victimization, exclusion and social problems.
